

# EXAMPLE

```
    s' );
```

```
    e.reject(err) );
```

```
name}</li>` ).join('')  
HTML = names;
```

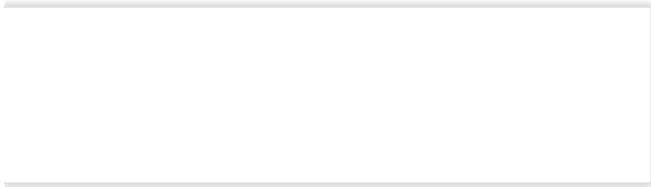

```
);
```

## **R TIPS**

ng  
r message directly from the service  
ir assignments and projects every  
just like you see on actual websites

# METHODS

the method

# ING DATA

URL

option

ormats

})

# HEADERS

headers property

```
})
```

]- just pass an object
